SAFETY DATA SHEET
Sodium Chlorite Solution
According to Regulation (EU) No 2015/830

SECTION 1: IDENTIFICATION OF THE SUBSTANCE/MIXTURE AND OF THE COMPANY/UNDERTAKING

1.1. Product identifier
Product name Sodium Chlorite Solution

1.2. Relevant identified uses of the substance or mixture and uses advised against
Identified uses Textile, cellulose, treatment of industrial and drinking water, wastewater treatment, deodorization, production of chlorine dioxide, feeding industry.

1.3. Details of the supplier of the safety data sheet
Manufacturer Turoksi Kimyevi Maddeleri Sanayi Ticaret Limited Şirketi
Ömerağa Mah. Fethiye Cad.
Karagöz İş Hanı No:48 D:7 İzmit/KOCAELİ
Tel: +90 262 321 65 76
Faks: +90 262 321 65 53
www.turoksikimya.com

Contact Person Hüseyin DURUMER

1.4. Emergency telephone number
Turoksi Kimyevi Mad. San. Tic. Ltd. Şti : +90 264 666 12 07 (office hours)

SECTION 2: HAZARDS IDENTIFICATION

2.1. Classification of the substance or mixture
Classification (EC 1272/2008)
Physical and Chemical Hazards Not classified.

Environment Aquatic Acute 1 - H400. Aquatic Chronic 3 - H412.

2.2. Label elements

Label In Accordance With (EC) No. 1272/2008

Signal Word Danger

Hazard Statements
H302 Harmful if swallowed.
H311 Toxic in contact with skin.
H314 Causes severe skin burns and eye damage.
H373 May cause damage to organs through prolonged or repeated exposure.
H400 Very toxic to aquatic life.
H412 Harmful to aquatic life with long lasting effects.
EUH032 Contact with acids liberates very toxic gas.
SAFETY DATA SHEET
Sodium Chlorite Solution
According to Regulation (EU) No 2015/830

Precautionary Statements

P260 Do not breathe vapour/spray.
P273 Avoid release to the environment.
P280 Wear protective gloves/protective clothing/eye protection/face protection.
P301+P310 IF SWALLOWED: Immediately call a POISON CENTER/doctor.
P303+P361+P353 IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water/shower.
P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P391 Collect spillage.
P405 Store locked up.
P501 Dispose of contents/container in accordance with national regulations.

2.3. Other hazards
This product does not contain another predicted danger.

SECTION 3: COMPOSITION/INFORMATION ON INGREDIENTS

3.2. Mixtures

The Full Text for Hazard Statements are Displayed in Section 16.

Composition Comments
- The data shown are in accordance with the latest EC Directives.

SECTION 4: FIRST AID MEASURES

4.1. Description of first aid measures

General information
Get medical attention immediately.

Inhalation
Remove affected person from source of contamination. Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. When breathing is difficult, properly trained personnel may assist affected person by administering oxygen. Place unconscious person on their side in the recovery position and ensure breathing can take place.

Ingestion
Rinse mouth thoroughly with water. Stop if the affected person feels sick as vomiting may be dangerous. Do not induce vomiting unless under the direction of medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an unconscious person. Place unconscious person on their side in the recovery position and ensure breathing can take place.
SAFETY DATA SHEET
Sodium Chlorite Solution
According to Regulation (EU) No 2015/830

Skin contact
Take off immediately all contaminated clothing. Rinse immediately with plenty of water. Continue to rinse for at least 15 minutes and get medical attention. Chemical burns must be treated by a physician.

Eye contact
Rinse immediately with plenty of water. Remove any contact lenses and open eyelids wide apart. Continue to rinse for at least 10 minutes.

4.2. Most important symptoms and effects, both acute and delayed

Inhalation: A single exposure may cause the following adverse effects: Corrosive to the respiratory tract. Symptoms following overexposure may include the following: Severe irritation of nose and throat.

Ingestion: May cause chemical burns in mouth, oesophagus and stomach. Symptoms following overexposure may include the following: Severe stomach pain. Nausea, vomiting.

Skin contact: Causes severe burns. Symptoms following overexposure may include the following: Pain or irritation, redness.

Eye contact: Causes serious eye damage. Symptoms following overexposure may include the following: Pain, redness.

4.3. Indication of any immediate medical attention and special treatment needed
No specific treatment. Treat symptomatically.

SECTION 5: FIREFIGHTING MEASURES

5.1. Extinguishing media

Extinguishing media
Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog. Use fire-extinguishing media suitable for the surrounding fire.

Unsuitable extinguishing media
CO$_2$ powder (powdered dry ice), foam or fire blanket.

5.2. Special hazards arising from the substance or mixture

Specific hazards
The product is not flammable or explosive. If it reaches 175 °C it decomposes to chlorine and chlorate. Subsequent decomposition of the chlorate produces oxygen which may give rise to the explosion or bursting of closed containers.

5.3. Advice for firefighters

Special Fire Fighting Procedures
Avoid breathing fire gases or vapours. Evacuate area. Cool containers exposed to heat with water spray and remove them from the fire area if it can be done without risk. Cool containers exposed to flames with water until well after the fire is out. If a leak or spill has not ignited, use water spray to disperse vapours and protect men stopping the leak. Avoid discharge to the aquatic environment. Control run-off water by containing and keeping it out of sewers and watercourses.

Protective equipment for fire-fighters
Wear chemical protective suit. Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing.

SECTION 6: ACCIDENTAL RELEASE MEASURES

6.1. Personal precautions, protective equipment and emergency procedures
Keep unnecessary and unprotected personnel away from the spillage. Wear protective clothing as described in Section 8 of this safety data sheet. Ensure procedures and training for emergency decontamination and disposal are in place. Avoid inhalation of vapours. Use suitable respiratory protection if ventilation is inadequate. Avoid contact with skin and eyes. Avoid contact with contaminated tools and objects.
6.2. Environmental precautions
Avoid discharge into drains or watercourses or onto the ground. Avoid discharge to the aquatic environment.

6.3. Methods and material for containment and cleaning up
Wear protective clothing as described in Section 8 of this safety data sheet. Clear up spills immediately and dispose of waste safely. Provide adequate ventilation. Approach the spillage from upwind.
Small Spillages: If the product is soluble in water, dilute the spillage with water and mop it up. Alternatively, or if it is not water-soluble, absorb the spillage with an inert, dry material and place it in a suitable waste disposal container.
Large Spillages: If leakage cannot be stopped, evacuate area. Flush spilled material into an effluent treatment plant, or proceed as follows. Contain and absorb spillage with sand, earth or other non-combustible material. Place waste in labelled, sealed containers.
Clean contaminated objects and areas thoroughly, observing environmental regulations. The contaminated absorbent may pose the same hazard as the spilled material. Flush contaminated area with plenty of water. Do not empty into drains. Dispose of waste to licensed waste disposal site in accordance with the requirements of the local Waste Disposal Authority.

6.4. Reference to other sections
For personal protection, see section 8.
See section 11 for additional information on health hazards.
For waste disposal, see section 13.

SECTION 7: HANDLING AND STORAGE

7.1. Precautions for safe handling
Do not smoke, eat or drink when handling the product. Avoid the formation of sparks. Maintain storage and work areas totally clean, devoid of any trace of foreign or incompatible products. Before handling the product, make sure that the containers, vessels and tanks to be used are clean, dry and appropriate for the intended use. Avoid mixing with incompatible products (acids, acid materials, reducers, combustible materials, oils, greases, rags, etc). Containers shall be properly closed and appropriately labelled. Avoid contact with the skin, eyes and clothing. Always use the recommended protective clothing.

7.2. Conditions for safe storage, including any incompatibilities
Keep in a dry place away from heat sources. Keep the product separated from flammables, combustibles, acids and organics. Avoid direct sunlight.
Recommended materials: For containers: Plastic (PP, PVC, PE), stainless steel tanks. For tanks and silos: Stainless steel, Polyester coated carbon steel, FRP
Incompatible materials: Wood, Rubber, Aluminium, Copper and Alloys.

7.3. Specific end use(s)
The identified uses for this product are detailed in Section 1.2.

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

8.1. Control parameters

STEL= Short term exposure limit

8.2. Exposure controls
Protective equipment

---
SAFETY DATA SHEET
Sodium Chlorite Solution
According to Regulation (EU) No 2015/830

Process conditions
Provide eyewash, quick drench.

Engineering measures
Provide adequate ventilation. Observe Occupational Exposure Limits and minimise the risk of inhalation of vapours.

Respiratory equipment
In the event of formation of chlorine dioxide use breathing protection mask with filter for inorganic gases B(Chlorine) for low concentrations (EN 136), for higher concentrations use self-contained breathing equipment. (EN 137).

Hand protection
Gloves for chemical hazards, PVC type (do not use leather or natural rubber) (EN 374).

Eye protection
If risk of splashing, wear safety goggles or face shield. (EN 166).

Hygiene measures
DO NOT SMOKE IN WORK AREA! Wash hands at the end of each work shift and before eating, smoking and using the toilet. Promptly remove any clothing that becomes contaminated. Wash promptly with soap & water if skin becomes contaminated. Use appropriate skin cream to prevent drying of skin. When using do not eat, drink or smoke.

Skin protection
Protection suit must be worn.

Environmental exposure controls
Avoid the product from reaching drains and/or surface waters.

SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

9.1. Information on basic physical and chemical properties

SECTION 10: STABILITY AND REACTIVITY

10.1. Reactivity
No data available.

10.2. Chemical stability
Stable under normal temperature conditions and recommended use. Stable under the prescribed storage conditions.

10.3. Possibility of hazardous reactions
In contact with acid materials (Acids, aluminium polychloride, aluminum sulphate, ferric chloride, etc.) chlorine dioxide is formed, with risk of explosion. Violent exothermic reaction, development of heat with reducing materials (sodium sulphite). Potential explosive reaction with combustible materials (wood, cellulose, grease, cotton...)

10.4. Conditions to avoid
Avoid exposure to high temperatures or direct sunlight.

10.5. Incompatible materials
Acids, acid substances (aluminum sulphate, aluminum chloride, ferric chloride...), wood, cellulose, grease, cotton.

10.6. Hazardous decomposition products
The product decomposes into chlorine dioxide and oxygen under heating and direct sun-light, with risk of bursting of containers.

SECTION 11: TOXICOLOGICAL INFORMATION

11.1. Information on toxicological effects

<table>
<thead>
<tr>
<th>Product</th>
<th>Acute toxic dose -LD50</th>
<th>Acute toxic dose -LD50</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sodium chlorite</td>
<td>811.4 mg/kg (oral – rat)</td>
<td>382.8 mg (dermal – rabbit)</td>
</tr>
<tr>
<td>Acute toxic dose-LD50</td>
<td>284 mg / kg (oral-rat)</td>
<td>134 mg / kg (dermal-rabbit)</td>
</tr>
</tbody>
</table>

Skin corrosion/irritation
May cause skin irritation.

Serious eye damage/irritation
May cause burns in the eyes. It may cause ulceration of the conjunctiva and of the cornea.

Respiratory or skin sensitisation:
Skin sensitisation: No data available.

Germ cell mutagenicity
Genotoxicity - In Vitro/ In Vivo
No data available.

Carcinogenicity
No data available.

Reproductive Toxicity – Fertility/ Development
No data available.

Inhalation
It can cause irritation of the respiratory tract and airways.
SAFETY DATA SHEET
Sodium Chlorite Solution
According to Regulation (EU) No 2015/830

Ingestion
It may cause burns in the mouth and oesophagus. It may cause intestinal perforation.

SECTION 12: ECOLOGICAL INFORMATION

12.1. Toxicity
Very toxic to aquatic life. Harmful to aquatic life with long lasting effects.

Acute toxicity to fish
Zebra fish, Sheepshead minnow rainbow trout
LC50, 96h 100 mg/l

Acute toxicity to aquatic invertebrates
Daphnia magna
EC50, 48h < 1 mg/l

Acute toxicity to microorganisms
Activated Sludge
EC50, 3h 6.5 mg/l

Acute toxicity to aquatic plants (algae)
Selenastrum capricornutum
EC50, 96h 1 mg/l (clorito 80%)

12.2. Persistence and degradability
There are no data on the biodegradability of this product.

12.3. Bioaccumulative potential
Irradiation of sodium chlorite solutions indicated a photodegradation half-life of about 30 minutes with a steady increase in pH (pH 8 to 12.6) and major products identified as hydroxide, chlorine dioxide and chloride with chlorate and hypochlorite as minor products and trace amounts of chloride. The radiation dose (9000 J/m²) needed to produce a 50% reduction in chlorite concentration suggests that the doses (200-250 J/m²) used for drinking water disinfection would not result in a significant reduction in chlorite concentrations. It is not considered technically appropriate to perform a ready biodegradation test on sodium chloride. However, sodium chloride is expected to be rapidly reduced to sodium chloride in the environment, especially in anaerobic conditions.

12.4. Mobility in soil
Due to its extremely low lipophilicity and high instability in water, sodium chlorite and hence chlorine dioxide are not expected to bioaccumulate in fish.

12.5. Results of PBT and vPvB assessment
This product does not contain any PBT or vPvB substances.

12.6. Other adverse effects
No data available.

SECTION 13: DISPOSAL CONSIDERATIONS

Genel Bilgiler
When handling waste, consideration should be made to the safety precautions applying to handling of the product.

13.1. Waste treatment methods
Dispose empty containers, rubbish and waste in accordance with local authority requirements. Environmental manager must be informed of all major spillages. Contact specialist disposal companies. Please recycle empty pack. Do not re-use empty containers. Clean empty container with water. An incineration plant can be burnt by the appropriate authorities.
SAFETY DATA SHEET
Sodium Chlorite Solution
According to Regulation (EU) No 2015/830

SECTION 14: TRANSPORT INFORMATION

General
This substance/mixture may be classified as hazardous. However, it may be dispatched as non-hazardous substance in cases when the packaging is under limited / exceptional quantity. Please follow the relevant regulations.

14.1. UN number
UN No. (ADR/RID/ADN) 1908
UN No. (IMDG) 1908
UN No. (ICAO) 1908

14.2. UN proper shipping name
Proper Shipping Name CHLORITE SOLUTION

14.3. Transport hazard class(es)
ADR/RID/ADN Class 8
ADR/RID/ADN Class Class 8 : Corrosive Substances
ADR Label No. 8
IMDG Class 8
ICAO Class/Division 8
Transport Labels

14.4. Packing group
ADR/RID/ADN Packing group II
IMDG Packing group II
ICAO Packing group II

14.5. Environmental hazards
Environmentally Hazardous Substance/Marine Pollutant Yes

14.6. Special precautions for user
EMS F-A, S-B
Emergency Action Code 2 X
Hazard No. (ADR) 80
Tunnel Restriction Code (E)

14.7. Transport in bulk according to Annex II of MARPOL73/78 and the IBC Code
Not applicable.

8/9
SAFETY DATA SHEET
Sodium Chlorite Solution
According to Regulation (EU) No 2015/830

SECTION 15: REGULATORY INFORMATION

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

Guidance Notes
Workplace Exposure Limits EH40. Introduction to Local Exhaust Ventilation HS(G)37. CHIP for everyone HSG(108).

EU Legislation

15.2. Chemical Safety Assessment
No chemical safety assessment has been carried out.

SECTION 16: OTHER INFORMATION

Information Sources
This SDS is prepared based on the information received from the product owner.

Revision Comments
This is first issue.

Issued By
Bülent Özdemir / CRAD Çevre Risk Analiz Denetim ve Eğitim Hizm. Ltd.Şti.
gbf@crad.com.tr   Tel: +90 216 335 4600

Hazard Statements In Full

H271   May cause fire or explosion; strong oxidiser.
H301   Toxic if swallowed.
H302   Harmful if swallowed.
H310   Fatal in contact with skin.
H311   Toxic in contact with skin.
H314   Causes severe skin burns and eye damage.
H318   Causes serious eye damage.
H373   May cause damage to organs (Spleen) through prolonged or repeated exposure.
H400   Very toxic to aquatic life.
H412   Harmful to aquatic life with long lasting effects.
